

Dissemination 2021

Published articles:

Our 2021 research results on cannabinoids allowed us to write and publish a Review paper in **Pharmaceutics**, an ISI-indexed journal with a 2020 impact factor of 6,321: Filipciuc LE, Ababei DC, Alexa-Stratulat T, Pricope CV, Bild V, Stefanescu R, Stanciu GD, Tamba BI. Major Phytocannabinoids and Their Related Compounds: Should We Only Search for Drugs That Act on Cannabinoid Receptors? *Pharmaceutics*. 2021 Nov 1;13(11):1823. doi: 10.3390/pharmaceutics13111823. PMID: 34834237; PMCID: PMC8625816.

International courses and conferences attended by project team members:

Between October 18-22 2021, CS III Cristina Uritu attended the “Preclinical Models Imaging Workshop” – in order to improve our acquisition techniques, our molecular PET-MRI image processing and our working methods on animal models as part of our preclinical studies.

In November 2021, three members of our team attended the “**1st Scientific Conference of Laboratory Animal Science at IULS**” held in Iasi by the Sorbonne University in collaboration with "Ion Ionescu de la Brad" University of Life Sciences. – where the participants benefited from many professors’ expertise from renowned universities in France, Denmark, Switzerland, Great Britain and Romania in the constantly-evolving field of animal research.
